Attachments: Honeywell CBP Well Closure Memo dated 2021_04_14.pdf; LCP OU2 HASP.pdf

Kristan – attached is the final memo along with an applicable HASP.

We are only executing the sparge well decommissioning plan at this time.

I've copied Joe Terry my field supervisor – his mobile number is (813) 943-8633

Subject: FW: [External] Sparge well abandonment timeline

Good afternoon Prashant,

I am following up on the below email to provide notification that TechLaw will be travelling to the LCP Chemicals site next week, arriving the morning of July 20-July 22, 2021 for oversight of field activities. Mr. James Carney (copied here) will be the TechLaw representative at the site next week. Could you provide a contact for Mr. Carney to communicate with upon his arrival? His contact information is below.

James B. Carney
Cell: (603) 540-9168
James.Carney@TechLawInc.com

Also, it would be helpful if we had the work plan(s) being executed and the Health and Safety Plan. My understanding is that the CO2 Sparge Well decommissioning is being conducted, but would like to confirm and understand if any other work plans are being implemented. The H&S Plan would be helpful to understand our needed level of protection.

Thank you for your assistance,

Kristan Avedikian

Hi all,
Field work at LCP started this week. Can you set up a couple of days of oversight next week?

Sincerely,
Robert H. Pope, GS-14

Subject: RE: [External] Sparge well abandonment timeline

Prashant,
Thank you for the update. If at all possible, I will try and get down to the site during the well abandonment. EPA may also send down the contractor to do some photo documentation.

I would really like to move forward with the sampling as soon as possible. In order to not have another round of comments, I request that you send the RTC first electronically so that if there are any issues we can resolve them before you submit the revised work plan. I don't expect to have major issues, but that process has been working well and I would like to stay on track.

I know we're some months behind the schedule we were shooting for last year and I would like to have a discussion soon on updating the schedule and where we are with getting to the FS and selecting a remedy. I have been talking to Angela and EPA will set up some meetings with the community in the Fall/Winter to get input and provide realistic expectations. I think Angela is going to reach out to your public affairs person - Victoria?

Sincerely,

Robert H. Pope, GS-14, Senior RPM
Superfund and Emergency Management Division

Rob, the field crew will get to site on Monday July 12th to get started on the sparge well abandonment. It is anticipated to take three to four weeks to complete.

We are in the process of preparing the surface soil RTC and revised workplan, hope to get that to you within two weeks, if not sooner.

Hi Prashant and Kirk,
I'm checking in on the projected dates for the field work. I had the week of July 12 on my calendar. Does that still work?

Also, I'm still looking for the surface soil sampling plan RTC.

Sincerely,
Robert H. Pope, GS-14
